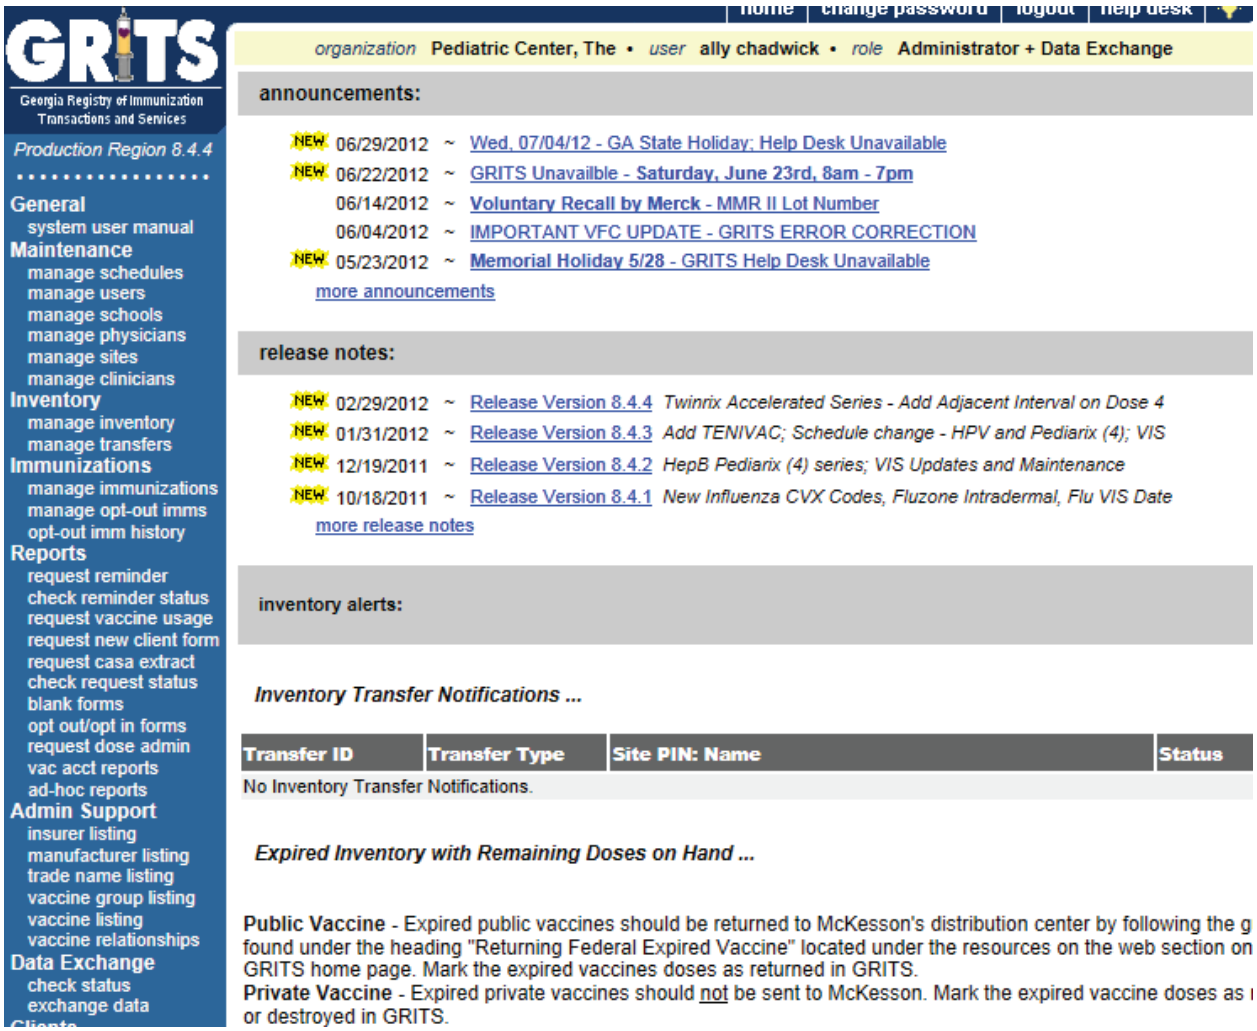
PCMH 6:F:3 Immunization Registry, for Georgia, our Registry is called GRITS

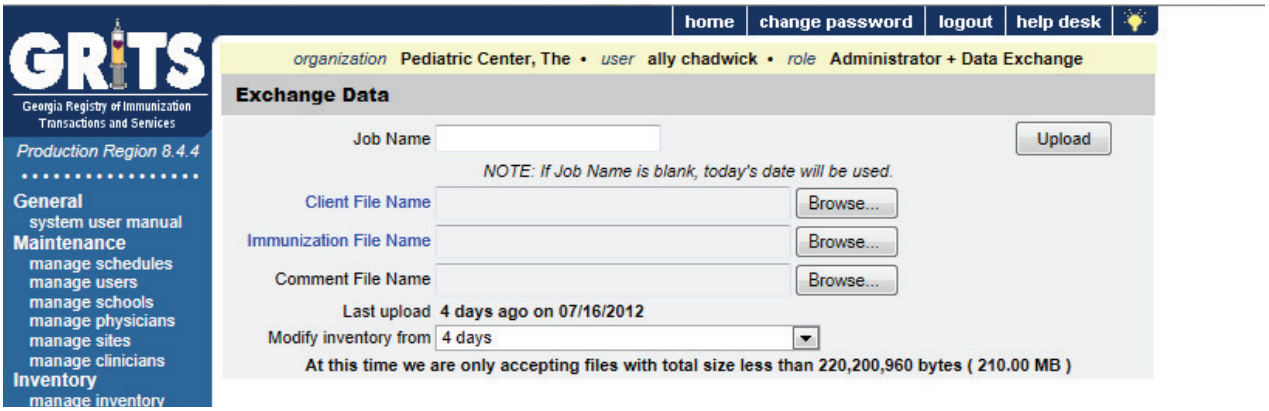
Our practice uploads an immunization file to the GRITS daily. The EHR is configured to work with our practice management system to automatically create a file of the daily immunizations administered and email the file to the Practice Administer. She uploads the file every morning (file is from previous day).

Home Page in Grits System

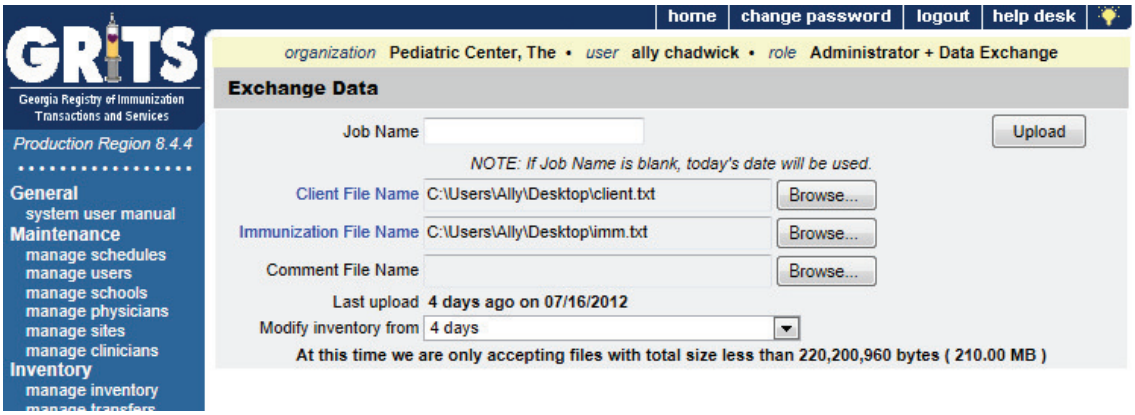


Click "exchange data" under the Data Exchange Heading

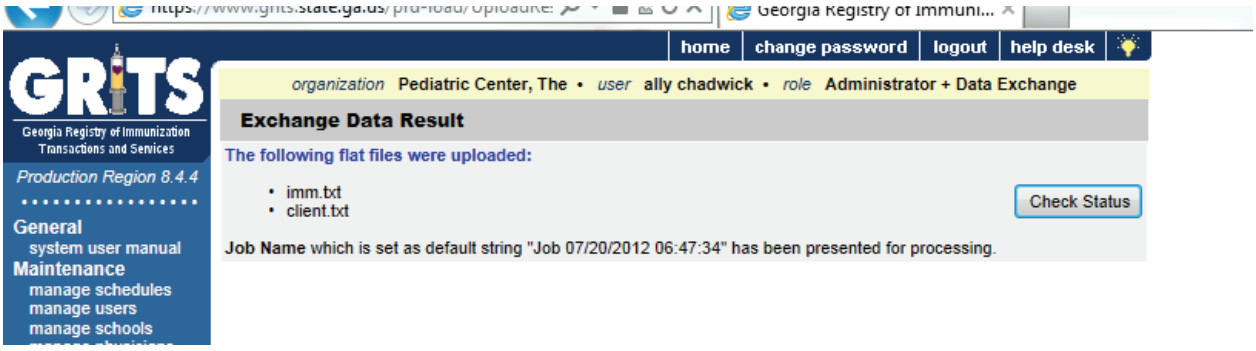
The Exchange Data window opens. Click "Browse" and select the client.txt file (list of patient names) & the imms.txt file (list of immunizations administered to the patients on the client file).



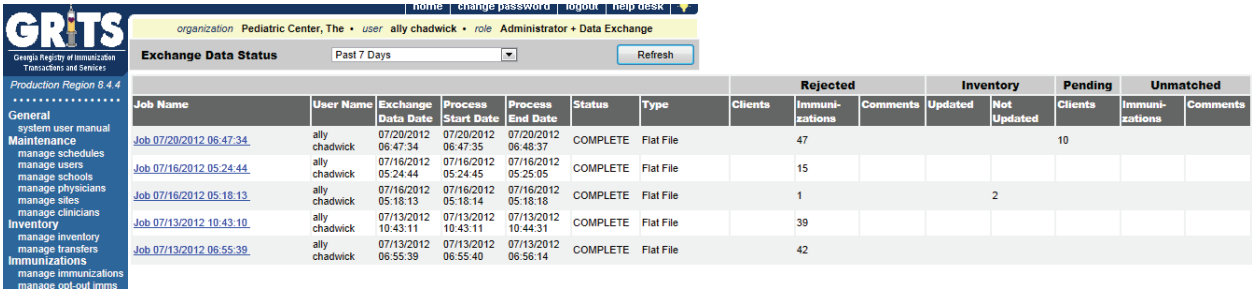
Click "Upload" to submit the files.



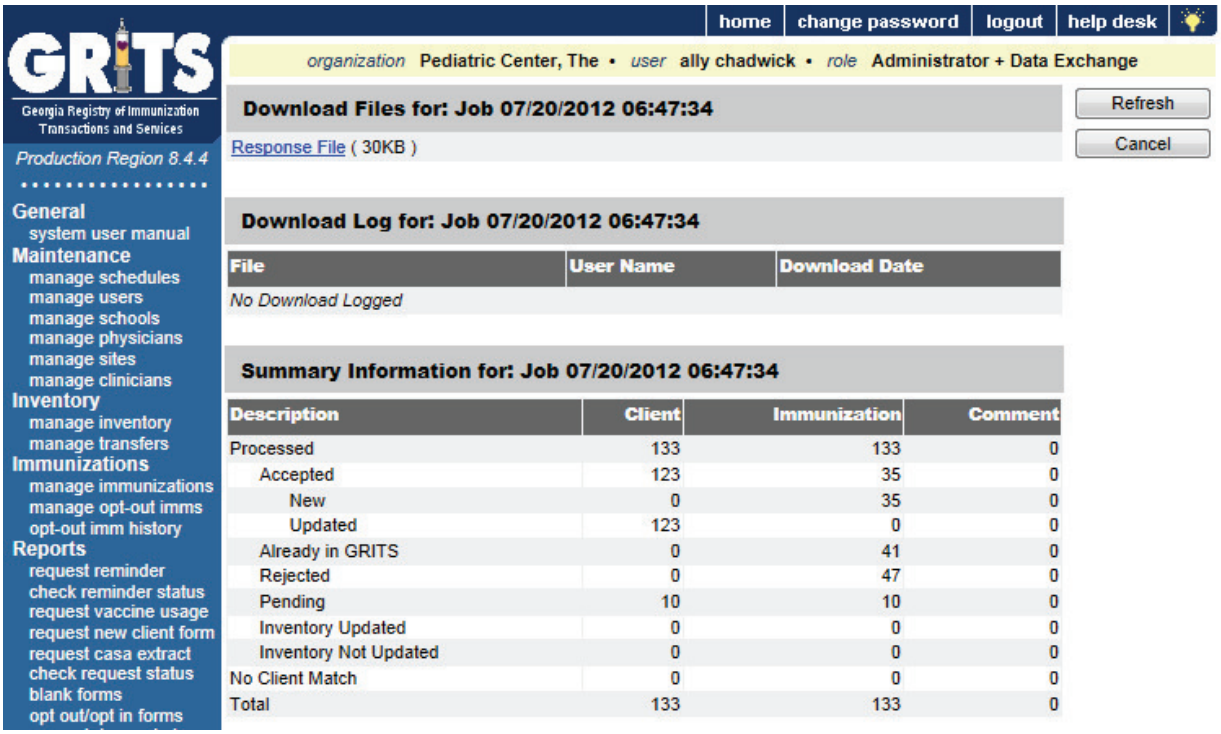
The Exchange Data Result window opens to display the files that were uploaded. Click "Check Status" to view the status of the files.



The Exchange Data Status screen displays uploaded files, status & other important details for the user.



Once the file's status is "COMPLETE", the Job Name becomes a blue link the user can click to see the details of the file. It opens a Summary Information screen. Click "Response File" to view the details.



The top portion of the report is the summary from the previous screen. Below the summary is the detailed data on each patient & immunization that has a status other than "Processed". The detailed report is reviewed by the Administrator for errors to correct. Corrective measures are taken and GRITS is notified if necessary.
