

**Factor 7: Providing an electronic summary of care report for more than 50 percent of referrals.**

If the Health Information Summary report is related to a referral or other transition of care, the user indicates so in the “Meaningful Use (ARRA) options” section at the top as shown in the above screen shot. This would then be counted as a “summary of care record” for a referral which, in turn, counts towards that particular Meaningful Use measure.

This is a core Meaningful Use measure reported as “Provide Summary of Care Record For Transitions of Care” in the “Meaningful Use Measures” report within PCC EHR.

### View Meaningful Use Measures

1118 qualifying patients

#### Provide Electronic Copy of Health Information

<u>4</u>	patients who meet criteria	
7	qualifying patients	= 57%

#### Provided Patient Education Resources
