

Factor 2: Documenting the patient's/family's choice of clinician

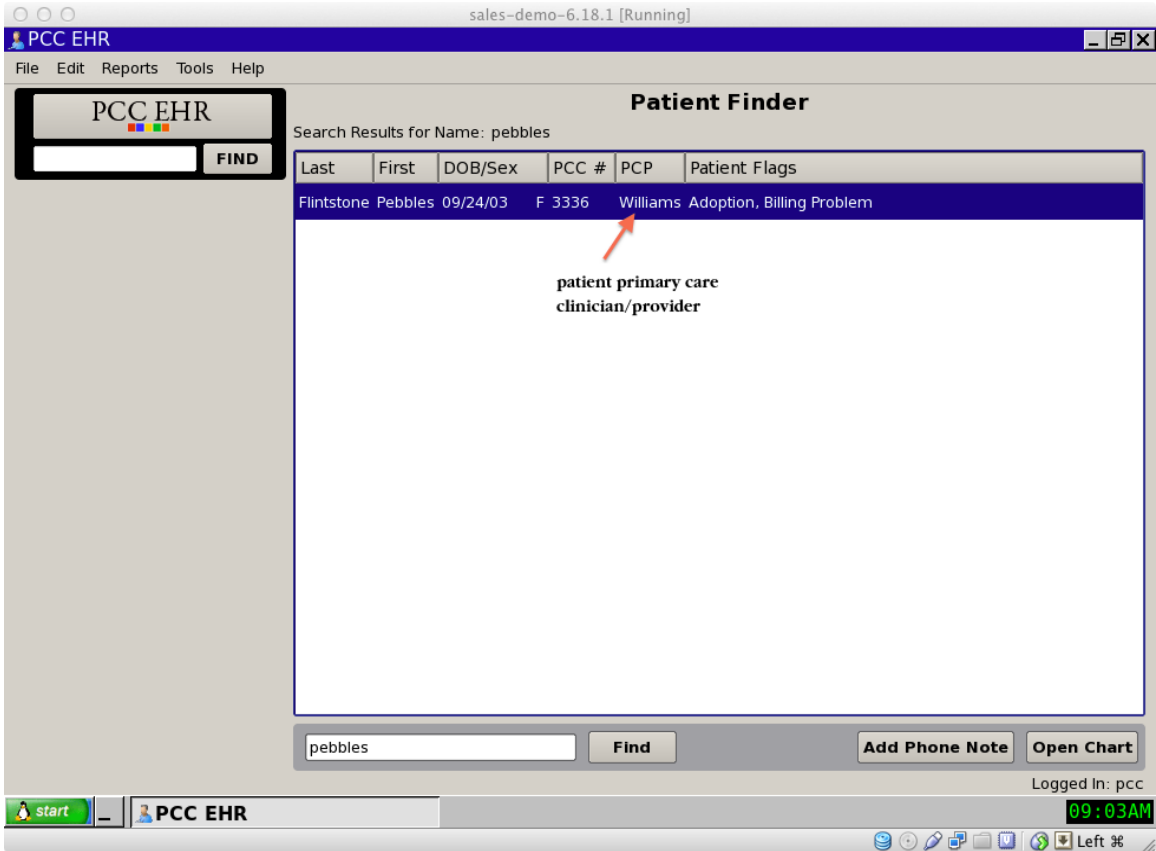

In Partner, a patient's primary care physician is documented within patient demographics in a field labeled "Physician." This field contains a list of all clinicians at the practice. Only one clinician can and should be chosen for each patient.

Pat PCC: 2974 Patient Editor Page 1 of 4

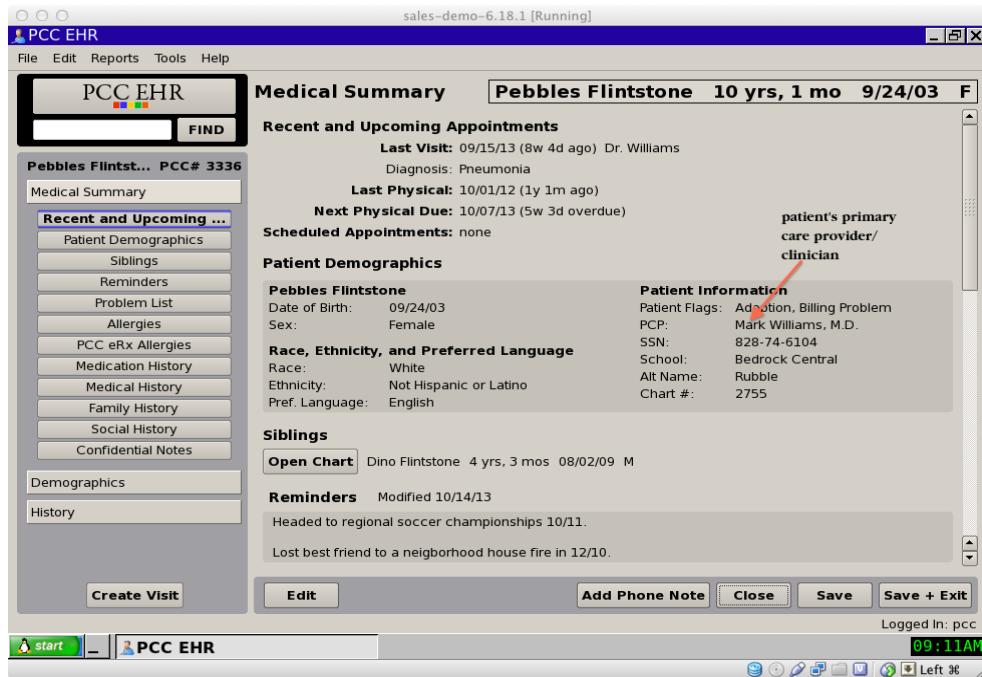

First Name:	Pebbles	Born:	Dec 11, 1997
Last Name:	Flinstone	Age:	15 yrs, 11 mo

A PCC EHR user can also see the patient's primary care clinician when searching for patients:

and when viewing a patient's chart:

When scheduling in Partner, a user is presented with the patient's primary care clinician on file before searching for an available appointment:

SAM Search Criteria
